About myself

Computer engineer based in Turin, Italy, currently pursuing a Master's degree in Software Engineering at the Politecnico di Torino, mainly interested in software development, operating systems and pc hardware.

Education & Training

Master's Degree in Software Engineering | Politecnico di Torino | 22/09/2025 - Current | Turin, Italy

Field(s) of study: Information and Communication Technologies

Bachelor's Degree in Computer Engineering | Politecnico di Torino | 01/10/2022 - 12/09/2025 | Turin, Italy

Field(s) of study: Information and Communication Technologies | Final grade: 93/110 | Address: Corso Duca degli Abruzzi 2410129

High School Diploma | Liceo Scientifico Statale "Galileo Ferraris" | 01/09/2017 - 01/06/2022 | Turin, Italy

Field(s) of study: Natural sciences, mathematics and statistics | Final grade: 88/100 | Address: Corso Montevicchio 6710129

Language Skills

Mother tongue(s): **Italian**

	Understanding		Speaking		Writing
	Listening	Reading	Spoken production	Spoken interaction	
English	C1	C1	C1	C1	C1

Work experience

AI and Software Engineer Intern | Assist S.P.A. | 01/03/2025 - 18/07/2025 | Turin, Italy

I worked for 250 hrs as an AI and software engineer, as a part of the internship of the third year of university. I helped designing and implementing an LLM based chatbot for customer support.

Key activities:

- prompt engineering with OpenAI's assistants;
- prototyping and coordination implemented via n8n;
- written a set of API to access company's database, used as tools by the model, operating on the Dotnet framework.

Skills

C Language - Intermediate knowledge | Linux and windows Intermediate Knowledge | Python Language - Basic knowledge | intermediate java knowledge | Relational Databases Fundamentals | Matlab fundamentals

Communication and interpersonal skills

Teamwork & Collaboration

I like working in a team, as this provides me and the others new perspectives, better efficiency and solutions. Through the years of university I joined numerous team projects, where I had the occasion to start to appreciate these environments

Supportive towards less skilled individual in my fields of knowledge

Skilled in supporting and guiding less experienced individuals in my fields of expertise, proven through tutoring

to high school students during my early university years

Other experiences

4-weeks stay in England | 01/09/2019 - 28/09/2019

I stayed at a local family's house for a didactic sojourn for 4 weeks, organized by my high school. We took daily english lessons in order to improve our skills and take the Cambridge "PET" level exam at the end of the stay

Hobbies and Interests

Electric Guitar Player

I recently picked up the electric guitar and I'm following lessons to learn to play it. I'm a lot into rock/metal music listening, and I want, one day, to play the music I currently listen to. It will be a long and demanding journey, but I'm confident in my ability to stay focussed and consistent

Video games

I've been passionate about video games ever since I bought my first gaming devices. I greatly enjoy automation games, where the player need to extract resources and process them until they are useful: the calculations and optimizations needed to be optimal can make hours come by way too fast.
